ECO HORTICULTURA & GARDEN CENTER GRUP

HISTORY

Eco Horticultura & Garden Center Grup started its activity in 1998 by producing and selling dendro material; it then owned a 20.000 sq. m nursery surface in Bucharest, in the Militari area.

Taking advantage of its own production as well as of the work of a professional team of architects, designers and engineers, Eco Horticultura & Garden Center Grup has successfully approached landscape architecture, soon becoming a leader in this field on the Romanian market.

Through the efficient exploitation of these opportunities, the company has continued on this ascending trend aiming simultaneously at the consolidation of the already existing activities and at the tackling of further areas: sports terrain turfing, installations of irrigation, artesian wells, urban furniture assembling, illumination systems, urban playing grounds and urban fitness devices assembling, tree gardening services, utilitarian climbing and infrastructure works (asphalting, canalization, support walls).

Thus, the newly adopted fields of activity have allowed our company to provide in a relatively short period of time a full range of services in the area of landscape architecture. Consequently, the "E-G" group of companies has now come to own its own nursery totaling 500.000 sq. m (from which 20.000 sq. m are greenhouses), 100.000 sq. m of greensward rolls, 4 show-rooms and over 600 employees. The Eco Horticultura & Garden Center Grup portfolio comprises: 200 set up parks (in Bucharest and, but also all over the country), about 1.500 gardens, the arrangement of over 150 urban playing grounds and about 4.500 pieces of urban furniture.

The implementation of a rigorous quality management system has been a major preoccupation for Eco Horticultura & Garden Center Grup.

It hence obtained the certifications of ISO 9001, 14001, 16001, OHSAS, RS 2000 standards.

ECO HORTICULTURA & GARDEN CENTER GRUP LANDSCAPE DESIGN

ECO HORTICULTURA & GARDEN CENTER GRUP is offering design services for different kind of spaces (outside or inside spaces, private or public spaces) with various dimensions: parks, gardens, squares, terraces, glass houses.

The design is done by specialists bachelors of specific fields as: landscape architecture, architecture, horticulture, constructions, roads.

We garden because we love it!

In the next period we will put accent on the quality development of our team. We are trying to become the undisputed leader on the market, through the complexity and refinement of our work and through the volume of jobs and plants that we offer.

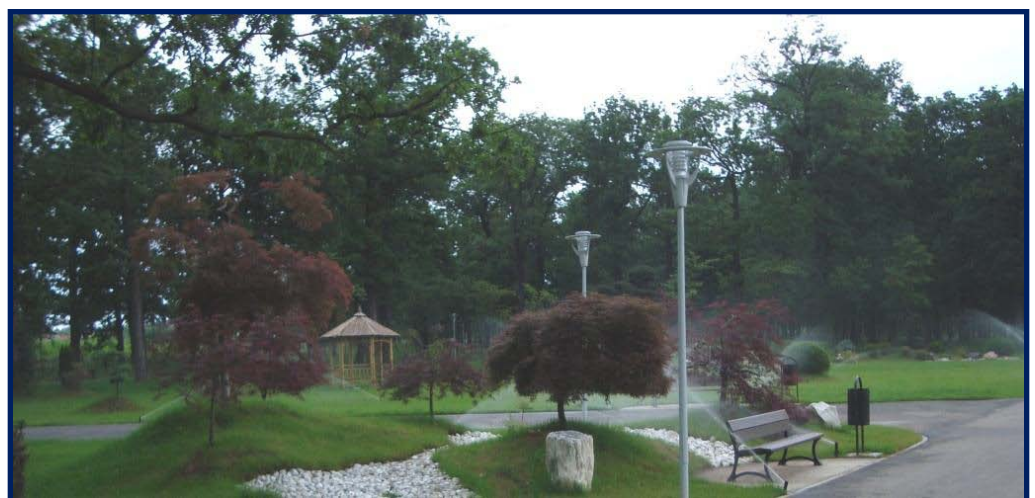

Today, more than 60% of the specialty services in Romania are executed by Eco Horticultura and Garden Center Grup, in association or as separate commercial entities.

Eco Horticultura & Garden Center Grup is executing:

- ☛ landscape arrangements after its own projects or after the beneficiaries projects;
